

DTBX STAKING

dtbx.exchange

What is Staking?

Staking is fixed deposit program that allows users to stake their top crypto tokens and earn rewards without having to actively trade or manage their assets.

This involves locking up an asset in a smart contract on the blockchain and receiving steady pay-outs in exchange for providing liquidity to the network. This is known as 'staking' and it's a great way to generate passive income.

Why is DTBX Platform better than Others?

DTBX is an established staking cryptocurrency exchange platform founded in 2020. It offers cryptocurrencies users a flexible and secure way to earn and trade digital assets and supports over 200 of the top coins and tokens, the staked platforms have state-of-the-art cryptocurrencies infrastructure, ensuring user safety and efficiency at all times.

DTBX Swap is an automated decentralized exchange on the Own DTBX blockchain. It allows token users to securely trade BNB, Ether and ERC-20 tokens in a trust less manner, without having to rely on a third party or middleman.
